

B-1B makes record-breaking flights

10/28/2003 - **EDWARDS AIR FORCE BASE, Calif.** -- A B-1B Lancer here flies overhead during the Edwards Air Force Base Open House and Air Show. The B-1B unofficially set and broke almost 50 new world speed records during the air show Oct. 25 and 26. Record-breaking courses included three, 15, 25, 100, 500 and 1,000-kilometer speed dashes. National Aeronautic Association officials still need to verify the results, before they become official. The NAA is the national authority in overseeing and certifying aviation records.
